

MARBLE PARK RETAIL OPERATIONS

Complete user guide

Customer promise to physical fulfilment

01 Lead + intent	02 Quote + revision	03 Partial order	04 Reserve / procure	05 Pick + dispatch	06 Payment + return
----------------------------	-------------------------------	----------------------------	--------------------------------	------------------------------	-------------------------------

For showroom sales, office, inventory, dispatch, managers and owners. This manual explains both the action and the control that proves the action was completed correctly.

Guide index

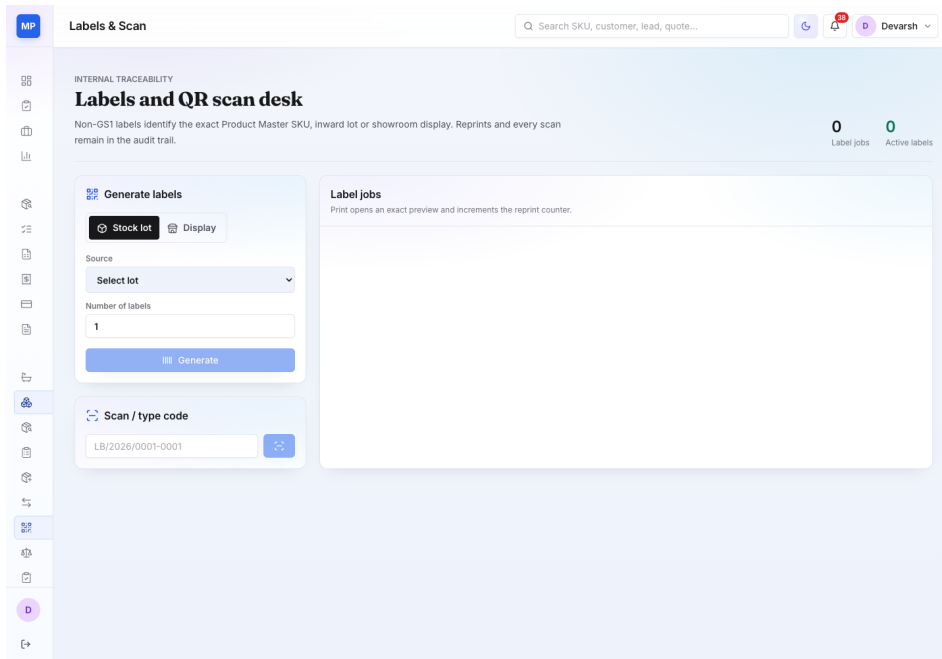

- 01** Set up master data and products 12 min | Owner / Inventory / Office
- 02** Quote tiles by area, piece or box 8 min | Sales / Owner / Office
- 03** Run lead, intent and quote revisions 14 min | Sales / Sales Manager / Office
- 04** Convert a quote in partial sales orders 11 min | Sales / Owner / Office
- 05** Procure shortages and receive stock 13 min | Inventory / Office / Owner
- 06** Print labels, scan and manage lots 9 min | Inventory / Dispatch
- 07** Pick, partially dispatch, deliver and return 15 min | Dispatch / Inventory / Office
- 08** Track payments and documents 7 min | Owner / Sales / Office
- 09** Count, reconcile and correct stock 12 min | Inventory / Owner
- 10** Use reports, approvals and audit 8 min | Owner / Sales Manager
- 11** Manage users, roles and settings 6 min | Owner

01 / OWNER - INVENTORY - OFFICE / 12 min

Set up master data and products

Create controlled brands, categories, finishes, vendors, tile sizes and Product Master SKUs before any transaction uses them.

Masters	-	Product SKU	-	Display code	-	Opening stock / GRN	-	Saleable lot
	>		>		>		>	

How to complete it

1. Create brand, category and finish records.
2. Upload the official logo in Brand Master and keep Quote footer enabled for brands that may appear on customer documents.
3. Create or bulk-import one Product Master SKU per saleable design.
4. For tiles, enter internal showroom code, size, pieces per box, box coverage, purchase UOM and default sales UOM.
5. Register displayed samples in Tile Master and print their QR labels.
6. Use Opening Stock only for go-live balances; use GRN for every later inward.

Training video: 01-master-data-and-tiles.mp4

Before you finish

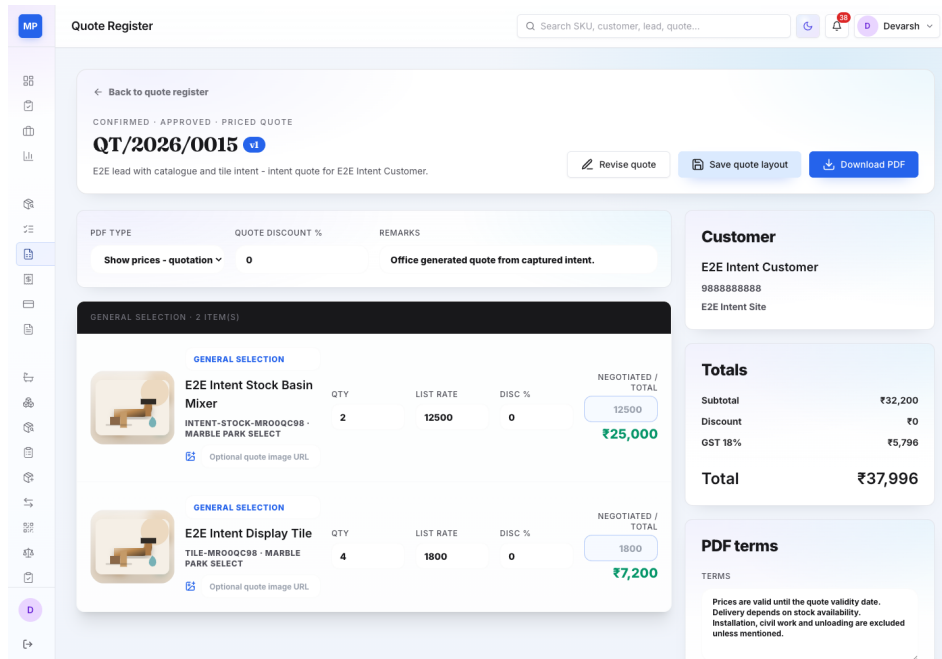

- OK** SKU is immutable after creation.
- OK** A display sample is not saleable stock.
- OK** Stock exists only after a posted opening session or GRN.

02 / SALES - OWNER - OFFICE / 8 min

Quote tiles by area, piece or box

Choose the commercial rate basis per quote line while the system continues to reserve and dispatch whole physical boxes.

Find display code	-	Choose Area / Pieces / Boxes	-	Enter need	-	System rounds boxes	-	Customer sees billed UOM
	>		>		>		>

QT/2026/0015 vi

E2E lead with catalogue and tile intent - intent quote for E2E Intent Customer.

PDF TYPE: Show prices - quotation | QUOTE DISCOUNT %: 0 | REMARKS: Office generated quote from captured intent.

Customer: E2E Intent Customer, 9888888888, E2E Intent Site

GENERAL SELECTION	QTY	LIST RATE	DISC %	NEGOTIATED / TOTAL
E2E Intent Stock Basin Mixer INTENT-STOCK-MR00QC98 - MARBLE PARK SELECT	2	12500	0	12500 / ₹25,000
E2E Intent Display Tile TILE-MR00QC98 - MARBLE PARK SELECT	4	1800	0	1800 / ₹7,200

Totals

Subtotal	₹32,200
Discount	₹0
GST 18%	₹5,796
Total	₹37,996

PDF terms

TERMS: Prices are valid until the quote validity date. Delivery depends on stock availability. Installation, civil work and unloading are excluded unless mentioned.

How to complete it

1. Search the internal showroom code or SKU in Quote Studio.
2. Select Area, Pieces or Boxes on the tile line.
3. For Area, enter required area and wastage percentage.
4. For Pieces, enter requested pieces; the system rounds to full boxes.
5. For Boxes, enter the physical box count directly.
6. Review the billed quantity, physical boxes, rate/UOM, GST and quote image before saving.

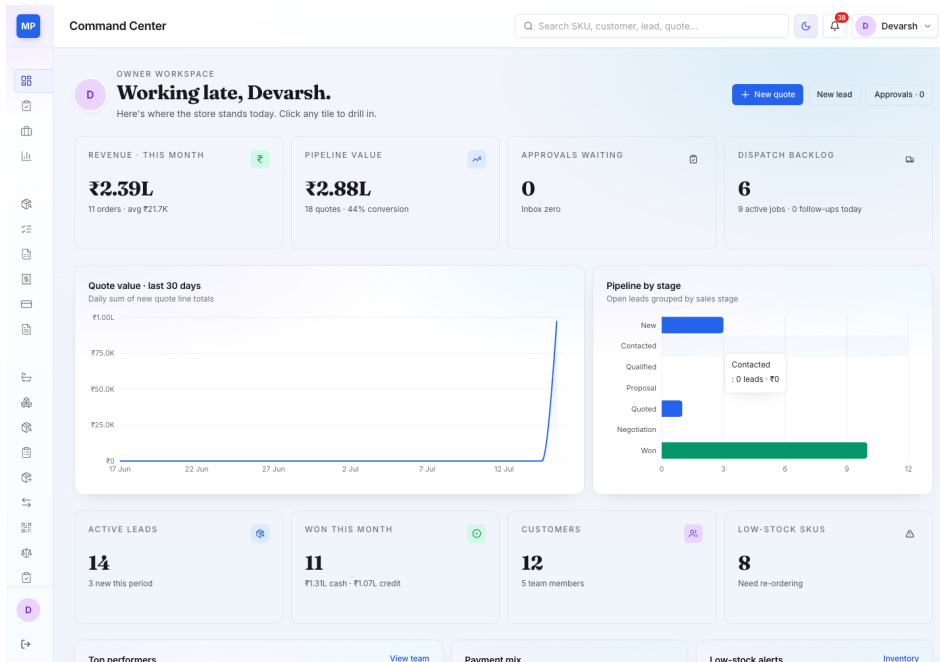

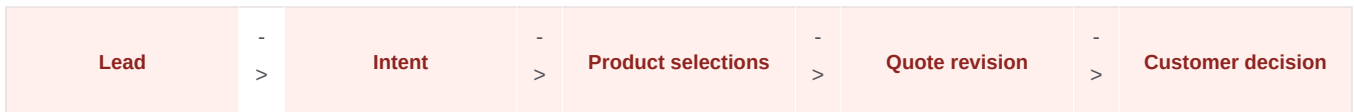

Training video: 02-tile-pricing-and-quotes.mp4

Before you finish

- OK** Area pricing needs positive coverage per box.
- OK** Piece pricing needs pieces per box.
- OK** Orders, reservations and dispatch always use the physical inventory quantity shown.

Run lead, intent and quote revisions

Capture the customer requirement, build room-wise selections, revise without losing history, and issue priced or selection-only PDFs.

How to complete it

1. Create or open the customer and lead.
2. Record site, budget, timeline and requirement notes.
3. Create an intent and add Product Master SKUs room by room.
4. Open Quote Studio from the intent or create a direct quote.
5. Edit the room, customer-facing image, internal design code, rate, discount and GST.
6. In Quotation footer, select only the served-brand logos that belong on this customer document.
7. Save a new revision when commercial lines must change after discussion.
8. Download the priced quotation or selection-only PDF and mark it sent.

Training video: 03-crm-lead-to-quote.mp4

Before you finish

- OK** Every line must reference an active Product Master SKU.
- OK** Below-floor negotiated rates require approval.
- OK** Commercial lines freeze after an order; use a revision for a new agreement.

04 / SALES - OWNER - OFFICE / 11 min

Convert a quote in partial sales orders

Convert only confirmed quantities, keep the remainder open, and avoid creating duplicate quotes for the same customer decision.

Confirmed quote lines	-	Select quantities	-	Sales order	-	Reserve stock	-	Backorder shortage
	>		>		>		>

How to complete it

1. Open the accepted quote and review Fulfilment.
2. Enter the quantity confirmed now for each line.
3. Choose cash or credit and record advance or terms.
4. Create the sales order; remaining quote quantities stay available.
5. Review reserved and backordered quantities.
6. Close the remainder only when the customer cancels it, with a reason.

Training video: 04-partial-order-and-procurement.mp4

Before you finish

- OK** Selections cannot exceed remaining quote quantity.
- OK** Each conversion is idempotent and creates its own dispatch job.
- OK** Shortages automatically create purchase demand.

Complete user guide | 6

VALUE

How to complete it

1. Open Procurement and filter open demand.
2. Group demand by vendor and create a purchase order.
3. Record supplier reference, expected date and ordered quantities.
4. Receive each delivery in GRN, including partial and damaged quantities.
5. Post the GRN to create inventory lots and internal label jobs.
6. Return to Pending Inward and confirm the customer shortage is allocated.

Training video: 04-partial-order-and-procurement.mp4

Before you finish

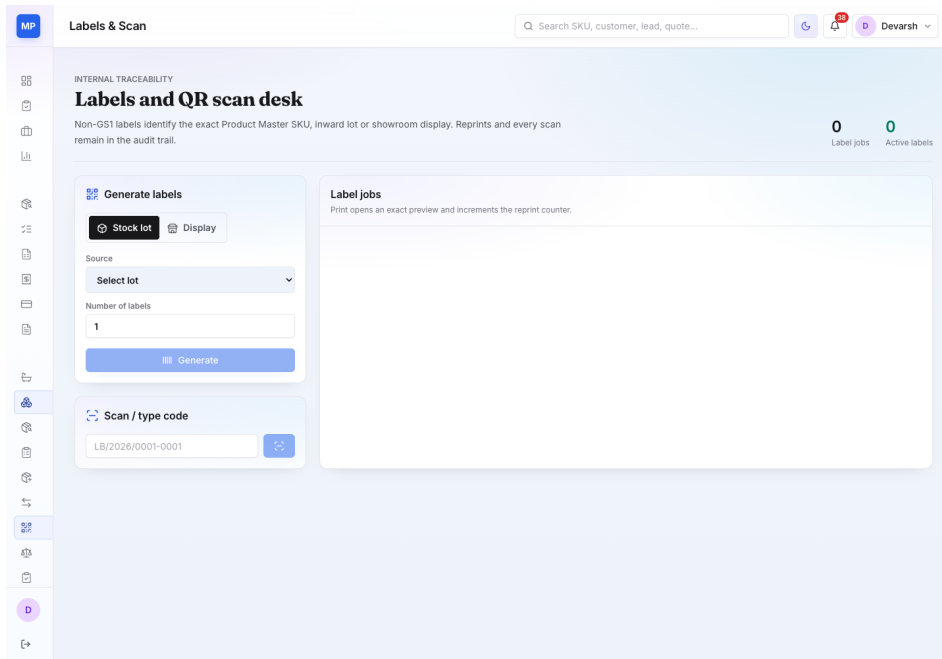

- OK** Never add live stock directly to balances.
- OK** Damaged quantity is isolated from available stock.
- OK** Every inward retains PO, GRN, lot, location and source links.

Complete user guide | 7

Print labels, scan and manage lots

Generate QR labels for each inward or display sample and use exact-lot identity during picking, movement and return.

GRN / opening / display	- >	Label job	- >	Print QR	- >	Scan lot	- >	Trace movement
--------------------------------	--------	------------------	--------	-----------------	--------	-----------------	--------	-----------------------

How to complete it

1. Open Labels & Scan after posting an inward.
2. Filter by source and choose the label template.
3. Print the required quantity and attach labels to boxes or sample displays.
4. Scan or search the code during stock review and dispatch.
5. Verify SKU, lot, location, inward reference, quantity and status before movement.

Before you finish

- OK** A QR identifies the system record; it does not replace printed human-readable details.
- OK** Reprints keep the same lot identity.
- OK** Display labels identify samples, not saleable quantities.

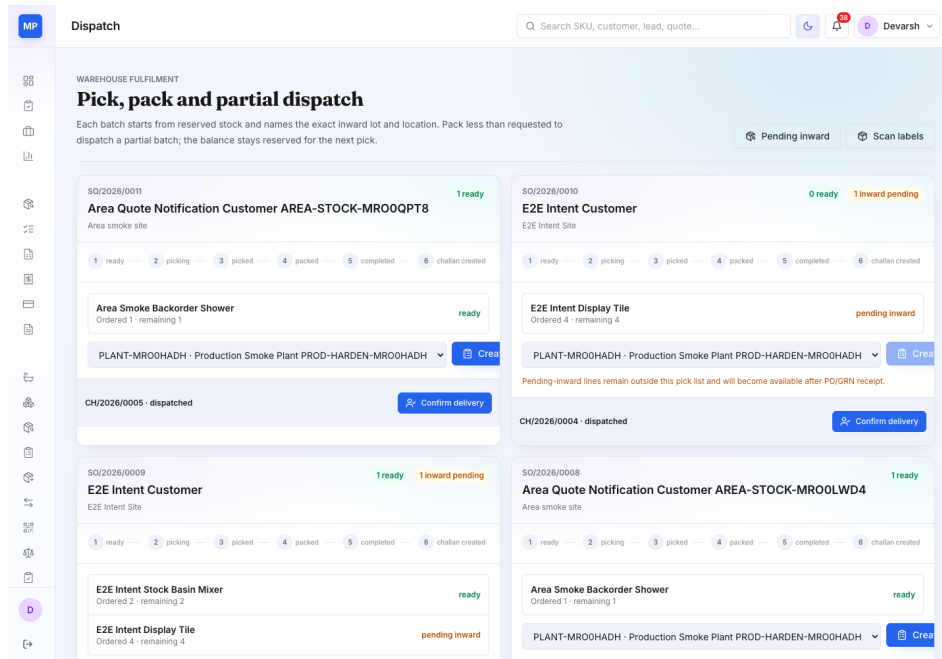

Training video: 05-stock-dispatch-and-returns.mp4

07 / DISPATCH - INVENTORY - OFFICE / 15 min

Pick, partially dispatch, deliver and return

Pick exact lots, create multiple challans against one order, prove delivery with OTP, and return stock to its original traceable lot.

Order line	-	Exact-lot pick	-	Pack	-	Challan	-	OTP delivery	-	Return / balance
	>		>		>		>		>	

The screenshot shows the 'Dispatch' screen in the MARBLE PARK ERP system. It features a sidebar with navigation icons and a main content area titled 'WAREHOUSE FULFILMENT' with the sub-header 'Pick, pack and partial dispatch'. Below this, there are several task cards for different orders and items, each with a progress bar and status indicators (e.g., 'ready', 'inward pending', 'pending inward'). The tasks include 'Area Quote Notification Customer AREA-STOCK-MROOQPT8', 'E2E Intent Customer', 'Area Quote Notification Customer AREA-STOCK-MROOQPT8', and 'Area Quote Notification Customer AREA-STOCK-MROOQPT8'. Each card shows the item name, ordered quantity, and remaining quantity, along with buttons for 'Confirm delivery' and 'Create'.

How to complete it

1. Open the order's dispatch job and review ready, backordered and already dispatched quantities.
2. Select the exact lot and quantity to pick.
3. Confirm pack quantities and create the delivery challan.
4. Repeat later for remaining items; do not create another sales order.
5. Send and verify delivery OTP to close the challan.
6. For a return, select the original dispatch line, reason, disposition and received quantity.

Training video: 05-stock-dispatch-and-returns.mp4

Before you finish

- OK** Cannot pick more than available or ordered balance.
- OK** Every challan is partial-safe.
- OK** A return must reference the original dispatch line and restores the correct lot when saleable.

Track payments and documents

Record cash advances or credit terms, monitor balance due, and retrieve the correct quote, order and receipt documents.

Sales order	- >	Advance / credit	- >	Receipt	- >	Balance due	- >	Document center
-------------	--------	------------------	--------	---------	--------	-------------	--------	-----------------

How to complete it

1. Choose payment mode during order conversion.
2. For cash, enter the received advance; for credit, confirm terms and due date.
3. Post later receipts against the sales order.
4. Review payment status and remaining balance.
5. Open Document Center for quote PDF, sales order PDF and generated records.

Before you finish

- OK** Receipt posting is idempotent.
- OK** Amount cannot exceed the order balance.
- OK** Credit orders remain visible until settled.

Count, reconcile and correct stock

Use controlled counts, approvals and reconciliation instead of editing balances, preserving an auditable inventory ledger.

Freeze scope	-	Count	-	Review variance	-	Approve / post	-	Reconcile
	>		>		>		>	

MP

Stock Reconciliation

Q Search SKU, customer, lead, quote...

D Devarsh

INVENTORY RECONCILIATION

Prove aggregate, plant, reservation and ledger stock are aligned.

Use this before client reviews, after imports, and after bulk GRN/dispatch activity. Critical rows mean stock math needs correction before dispatch promises are made.

AREA-BACK-MR00QPT8 Area Smoke Backorder Shower MARBLE PARK SELECT - FAUCETS & SHOWERS	On hand: 1 Available: 0 Reserved: 1 Damaged: 0	Rows: 1 On hand: 1 Reserved: 1 Damaged: 0	Reserved rows: 1 Backordered: 0 SO reserved: 1 SO backorder: 0	2	OK
AREA-STOCK-MR00QPT8 Area Smoke Stocked Diverter MARBLE PARK SELECT - FAUCETS & SHOWERS	On hand: 1 Available: 1 Reserved: 0 Damaged: 0	Rows: 1 On hand: 1 Reserved: 0 Damaged: 0	Reserved rows: 0 Backordered: 0 SO reserved: 0 SO backorder: 0	3	OK
INTENT-STOCK-MR00QC98 EZE Intent Stock Basin Mixer MARBLE PARK SELECT - FAUCETS & SHOWERS	On hand: 1 Available: 1 Reserved: 0 Damaged: 0	Rows: 1 On hand: 1 Reserved: 0 Damaged: 0	Reserved rows: 0 Backordered: 0 SO reserved: 0 SO backorder: 0	3	OK

How to complete it

1. Create a stock count session for a location or scope.
2. Enter counted quantities by scanned lot.
3. Submit the count and review variance.
4. Approve and post the adjustment with reason.
5. Open Reconciliation to confirm lot, location, ledger and aggregate balances agree.

Before you finish

- OK** Only posted sessions affect stock.
- OK** Adjustments require reason and permissions.
- OK** Reconciliation should show zero critical differences before go-live.

Use reports, approvals and audit

Monitor pipeline, orders, inventory and exceptions while retaining a searchable record of sensitive actions.

Operational event	- >	Approval / audit	- >	Report	- >	Exception action
-------------------	--------	------------------	--------	--------	--------	------------------

How to complete it

1. Use Command Center for role-specific work queues.
2. Open Approvals for below-floor quotes and controlled changes.
3. Use Reports for sales, order, payment and stock summaries.
4. Open System Audit to inspect who changed what and when.
5. Follow exception links back to the operational record and resolve there.

Before you finish

- OK** Reports are decision surfaces, not stock-editing tools.
- OK** Role permissions determine visible and allowed actions.
- OK** Audit records are append-only evidence.

Manage users, roles and settings

Issue named user accounts, apply least-privilege roles, test access, and maintain company/document settings.

Company identity	->	Document defaults	->	Create user	->	Assign role	->	Permission check	->	Audit
------------------	----	-------------------	----	-------------	----	-------------	----	------------------	----	-------

How to complete it

1. In Settings, maintain the company logo, address, GSTIN, phone, email, quotation title, default terms, bank details and footer.
2. Choose Light, Dark or System appearance; System follows the device preference.
3. Create one named account per staff member.
4. Assign Sales, Office, Inventory, Dispatch, Manager or Owner role.
5. Apply an override only when the standard role needs a documented exception.
6. Test the user’s navigation and one allowed action.
7. Deactivate departed users instead of reusing accounts.

Before you finish

- OK Never share the owner login.
- OK Users cannot grant permissions they do not control.
- OK Password and role changes are auditable.
